PROFESSIONAL SUMMARY

Final-year Data Science undergraduate at Garden City University with hands-on experience across machine learning, computer vision, and full-stack web development through 5+ independently built projects. Skilled in Python, SQL, Java, and React.js, with a strong foundation in translating data into actionable insights and building reliable, real-world applications. Open to Data Science, Machine Learning, and Software Development internship opportunities.

PROJECTS

Vehicle Number Plate Detection System | *Python, OpenCV, Tesseract OCR*

- Built a real-time plate detection pipeline using OpenCV contour detection and adaptive thresholding, reliably working across 5+ vehicle types.
- Integrated Tesseract OCR with ROI cropping and perspective correction for automated plate-text extraction under varied lighting.

Weather Forecast Application | *JavaScript, HTML/CSS, OpenWeather API*

- Built a web app integrating the OpenWeather REST API for real-time weather and 5-day forecasts across any searched city.
- Displayed 6+ weather parameters with icon-based indicators and robust error handling for invalid inputs and API failures.

Job Scheduling System | *Java, OOP, Data Structures*

- Designed a priority-queue-based scheduler in Java managing 100+ tasks across deadline-driven and priority-based execution modes.
- Applied OOP principles across 6+ classes and optimized dispatch logic, cutting simulated job wait time versus a FIFO baseline.

SKILLS

- Python
- Java
- SQL
- JavaScript
- React.js
- HTML & CSS
- Git & GitHub
- MS Office
- Problem Solving
- Analytical Thinking

EDUCATION

Bachelor of Technology (B. Tech) – Data Science

Garden City University

Pre-University Course (PUC)

St. Joseph's Pre-University College

Secondary School Leaving Certificate (SSLC)

St. Anne's High School
